5km Outdoor Point To Point CPE - Cod. 486622408

What It Does

O3 5km outdoor point to point CPE is designed to WISP CPE solutions and long distance wireless network solutions for video surveillance and data transmission. It features up to 800mW wireless transmission power and has a built-in 12dBi directional

dual-polarized antenna which provides an efficient way to pick up and maintains a stable signal for a wireless network connection ranging multiple kilometers.

Main Features

- 2.4G 150Mbps
- IP64 waterproof enclosure
- 12dBi directional daul polarized antenna
- AP, Station, WISP etc operating mode supported
- Up to 60 meters of flexible deployment with included PoE Injector

5km+ Data Transmission

O3 is designed for outdoor long distance wireless data transmission. Adopting of 800mW external power amplifier and 12dBi directional antenna to achieve 5km+ transmission range.

Professional Outdoor Design

Equipped with IP64 waterproof enclouse and 6kV lightning protection capability, O3 can work in various weather conditions, such as sunshine, rainfall, wind, snow or extremely low/high temperature environment.

Easy to Manage

O3 also comes with a centralized management software that helps users easily manage all the devices in their network from a single computer–CPE Assistant.

Multiple Application Scenarios

Long-Distance Wireless Connection

One work as AP mode and another work as Station mode to create a long distance wrieless connecton for video surveillance and data transmission.

WISP(Client+Router) Mode

Wirelessly connect to WISP station/hotspot to share Internet to local wireless and wired network.

P2MP Link

Link multi AP in a network, all the associated client can communicate with each other.
